Amethyst Hill Nursery

ARBORESCENS—This is a very hardy family of white hydrangeas. *Arborescens* is hardy down to zone 4 and blooms on new wood. They can take full sun in all but the most southern gardens.

HYDRANGEA ARBORESCENS PRICE GROUP C

Annabelle—Prolific and large pure white snowball like flower heads, strong stems support traditional flowers. The most reliable performer of all hydrangeas.

HYDRANGEA ARBORESCENS PRICE GROUP E

Radiata—The underside of the fuzzy leaf is silver, lacecap type bloom, large sprawling habit. Blooms on new wood and will get second bloom with pruning.
Hayes' Starburst—Lacecap, double frilly bloom from Alabama plant collector Jackson Hayes.

ASPERA—The *aspera* hydrangeas are known for their fuzzy leaves and stems and dome-shaped lacecap bloom. Most are tall and slender growing hydrangeas with sparse leaves that show off the exfoliating bark. Hardy to zone 6 but needs protection in windy locations.

HYDRANGA ASPERA PRICE GROUP D

Var. *Villosa*—Lacecap type bloom with fluorescent blue flowers

HYDRANEGA ASPERA PRICE GROUP E

Kawakamii—Slender leaves and large dome shaped bloom
Macrophylla—The pure species, wonderful fuzzy leaves and lavender blooms
Mauvette—Like *Sargentiana* but bloom is more spherical and symmetric
Robusta—Extremely fuzzy leaves, pods turning to dome blooms
Rocklin—Dark green slender leaves set off fluorescent purple center
Sargentiana—Large lacecap of pale purple and white. Dome shaped head.

CLIMBING—This group includes climbing hydrangea and close relatives from all over the world.

HYDRANGEA—Climbing PRICE GROUP D

Anomala petiolaris—White lacecap bloom, fall color, deciduous, zone 4 rated

Amethyst Hill Nursery

HYDRANGEA—Climbing PRICE GROUP E

Anomola ‘Brookside Littleleaf’—Small serrated leaves, compact habit, zn 4
 Anomala Petiolaris ‘Miranda’—Yellow margins, dark green leaves, white lacecap
 Intergerimma—Like Integrifolia but larger leaves, zone 8
 Intergrifolia—Zone 8 evergreen climber with pods to white lace
 Quelpartensis—Climbing shrub with small dark green leaves, zone 4
 Schizophragma Hydrangeoides ‘Moonlight’—Large white blooms, zone 5
 Schizophragma Hydrangeoides ‘Roseum’—Large pale pink bloom, zone 6
 Seamanii—Zone 8 climber with evergreen thick slender leaves

HIGHLIGHTED VARIETIES PRICE GROUP D

Ayesha—One of the rare scented varieties. Sterile florets resemble tiny spoons and are pale pink, mauve or light blue. Great glossy green leaves. Zone 6
 Japonica Coerulea—Perfect lacecap with fertile center flowers deep blue. The sterile flowers light blue to white. Superior hardiness (zone 5) and early bloomer

HIGHLIGHTED VARIETIES PRICE GROUP E

Dichroa febrifusa—Ancient variety that is evergreen with lavender lacecap type flowers in late spring, blue fruit in the winter, zone 7
 Painter’s Palette—Open pollinated seedling from Dr. Dirr breeding program, lovely compact plant with lacecap of white and green that ages pink, zone 6

INVOLUCRATA—Wonderful family of lacecaps that grow 3 to 5 feet high and wide. Characterized by slender and slightly fuzzy leaves and pod-like flower buds, this family is native to Japan and Taiwan. Blooms an extraordinarily long time in mostly shady and zone 7 and higher gardens.

HYDRANGEA INVOLUCRATA PRICE GROUP D

Involucrata Tama Azisai—Unique! Round pod unfolds to showoff a small lacecap with white and pink flowers. Blooms early and on new wood!
